The university president pays a sudden tour to the faculty of engineering in Benha

Prof. Dr. El-Sayed EL-kady, the university president asserts that the medical service of the students should be of high quality. This statement concurs with his sudden visit to the faculty of engineering in Benha for the second time in a row in the presence of prof.Dr. Sameh Nada, the faculty dean and the faculty's staff members.

The university president inspects the educational process and gets to know the problems that face the students during his meeting with the faculty's students in the lectures halls. The university president stresses that the faculty should be clean indicating that the deans' board in the university decides to impose a ten pound fine on the smokers in the university campus.
